In my case, I can apply 3 patches correctly in Lucky Patcher, but when I try to install an unsigned APK over a legitimate one, it seems to work, but the installation stops at 80% or just says "Install" forever. When I restart the emulator it looks like the old legit apk is still installed, BMT overlay and special permissions are not requested. Any suggestions? Did you also gamble legally before founding Facebook? I didn't play the original APK (from play store), sir, I played with the original APK in 2018 because I found a mod for this game that I never play with the original. I turn on my phone and suddenly I can't connect to Facebook to log into my account. "Login failed. There was an error logging in to this application. Please try again later." In Bluestacks, I am automatically logged in after installing the modded apk, but the error pops up on my phone every time. I tried stopping FB and logging back in, still the same problem.
